

MPC Fuel Control

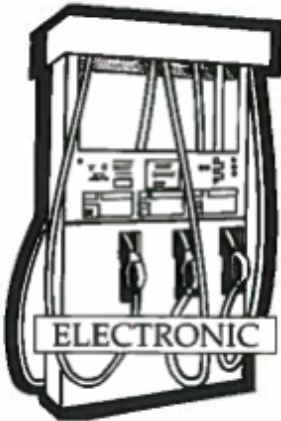

The MPC console is designed to interface with a wide range of retail gasoline dispensing equipment, including mechanical pumps and Bennett, Gilbarco, and Tokheim electronic dispensers. MPC consoles have many features including expanded operational reports, individual fueling position keys, programmable printer receipt heading, and more.

The MPC console replaces existing TMS-800F, 800F PLUS and TMS-16 consoles, providing improved features and benefits.

The Hybrid MPC console will control any combination of mechanical pumps and electronic dispensers up to 16 hoses.

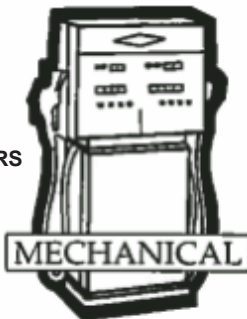

TOKHEIM
BENNETT
GILBARCO

For Electronic Pumps, Dispensers, MPD's

The MPC with electronic interface can control as many as 16 fueling positions with up to 4 products per position.

ALL
MANUFACTURERS

For Mechanical Pumps and Dispensers

The MPC with mechanical interface can control up to 16 hoses regardless of the pump manufacturer. Mechanical totalizer readings from the pump can be programmed into the console for convenient tracking.
